FOUNDER

Founder

Mr. Liu Chun Liang

Certificate: JIANGSU Scienced and Technology Entrepreneurs

- 1989: Salesman in local village enterprises
- 1996: Director of Suzhou New District Weikang Medical Apparatus Factory
- 2009: General manager of Suzhou Weikang Medical Apparatus Co.,Ltd
- 2015: Chairman and general manager of Jiangsu Weikang Jiejing Medical Apparatus Co.,Ltd
- 2016: North Jiangsu Entrepreneurship Leaders Award in December
- 2017: Selected 1000 Top Talents in Suqian City in October, Shanghai Jiaotong University International President EMBA Class (No. 33) in November
- 2018: Elected NPC deputies of Jiangsu Province in January. Jiangsu Science and Technology Entrepreneur 's Evaluation in June
- 2019: Appointed a Master 's Degree in Material Engineering, Beijing University of Chemical Technology

Corporate Culture Manual

Mission:

Helping people regain their lives

Values:

With my conscience for your rest assured

Management Idea:

Great business, health care

Quality Policy :

Remember original intention, sick to your requirements, improve system, commitment requirements

Enterprise Spirit:

Diligence, pragmatism, innovation, loyalty

Corporate Vision:

Focus on the medical industry, be a safe enterprise leading the industry

Company Profile

Weikang Medical founded in 1996, has six wholly-owned subsidiaries.For more than 20 years, Weikang has focused on the development, production and sales of disposable medical supplies. At present Weikang has formed five series, including Respiratory Care, Anesthesia, Urology, Surgery and Miscellaneous Supplies. The industry covers the complete manufacturing chain of medical products such as PVC granulation, injection molding, extrusion, assembly, packaging and sterilization. In the international market, Weikang provides service to many Fortune 500 companies. In the domestic market,Weikang provides a full range of high quality disposable medical devices for thousands of hospitals.With the mission of helping people regain their healthy lives, Weikang constantly innovates to ensure customer satisfaction and rapidly develops into China's first-class brand medical device enterprise.Weikang has obtained 47 copies of Class 2 medical device registration certificates and 3 copies of Class 3 registration certificates .It has passed ISO13485:2016 and CE Certificate, FDA registration and obtained more than hundreds intellectual property certificates including invention patents.

Future Development

Product upgrade: The main line of surgery and respiratory products, implementation of upgrading, upgrading product level, enhance brand competitiveness.

Equipment upgrade: Promote the "automatic substitution" program, introduce automatic production lines such as drainage bags, silicone foley catheters, suction catheter, etc., to resolve the contradiction between human supply and demand under the new situation.

Scientific research: Production, study and research combined, Strategic cooperation with Beijing University of Chemical Technology. Strengthen the internal culture and lead the construction,and invest in the construction project of the Institute of Medical Polymer Materials.

Multi-industry development: Aiming at the direction of great health, stepping into the military rehabilitation and leisure, health care and other industries, forming a development pattern of coexistence of one industry and multiple industry.

Production Chain

The company's industry covers granulation, injection molding, tube extrusion, assembly, blister, packaging, sterilization and other processes, has formed a complete production chain of disposable medical products.

Overview of Factory

Administration building

Corner

Products and Markets

The company's industry covers granulation, injection molding, tube extrusion, assembly, blister, packaging, sterilization and other processes, has formed a complete production chain of disposable medical products. Main products series : Respiratory Care, Anesthesia, Urology, Surgery and Miscellaneous Supplies.

Domestic market:

Products are sold to Beijing, Shanghai, Tianjin, Chongqing, Guangzhou, Wuhan, Shenyang, Harbin, Taiyuan, Taiwan, Hong Kong all together 32 provinces (autonomous regions, municipalities) first and second-tier cities

International market:

Since 2005, Weikang has entered the international market, and the products has been sold to more than 68 countries and regions including Europe, Asia, North America, South America, Africa and Oceania.

CertifiCation

A Respiratory Care

- Nebulizer mask
- Nasal cannula
- Oxygen tubing
- Oxygen mask
- Venturi mask
- Non-rebreathing mask
- Manual resuscitator
- Tracheostomy mask
- Drainage bag

B Anesthesia

- Suction catheter
- Closed suction catheter
- Mucus extractor
- Laryngeal mask airway
- Endotracheal tube
- Intubating stylet
- Anesthesia face mask
- Guedel airway
- Berman airway

C Urology

- Urine meter drainage bag
- Urinary drainage bag(Anti-Reflux type I)
- Urinary drainage bag(Anti-Reflux type II)
- Silicone foley catheter
- Urinary drainage bag
- Nelaton catheter

D Surgery

- Suction canister&liner
- Suction connecting tube
- Finger tip connector
- Yankauer
- Drainage tubing
- Bubble tube

E Miscellaneous

- Stomach tube
- Rectal Tube
- Irrigation syringe
- Nasogastric tube
- Bulb Irrigation syringe
- Feeding tube
- Feeding bag
- Drainage bottle

A Respiratory Care

| Venturi mask | Drainage bag |

Nebulizer Mask

Respiratory Care

Respiratory Care

Nasal Cannula

Scope of application

The product is suitable for drug atomization inhalation of patients with respiratory system diseases

Applicable

Pediatrics,Respiratory, Otolaryngology, ICU,Thoracic surgery,Cardiology, Outpatient and other departments

Product features

- Medical PVC, transparent, soft and comfortable mask
- Specially used to avoid cross-infection
- Adults and children special colors, avoid a single tone, stabilize the patient's mood
- The design can hold the handle, patients can use by themselves according to the operating procedures, reduce the workload of medical staff
- The connector adopts butterfly design
- Can be connected with various types of compressor or central air supply system for atomization
- Low residue

Available in a wide variety of tubing lengths

REF	Description	Medicine Cup	Hand Held/Mask
02018101	Adult	A1,6ml	Mask
02018102	Pediatric	A1,6ml	Mask
02018103	Infant	A1,6ml	Mask
02018104	Adult	A1,6ml	Hand Held
02018105	Adult	A2,6ml	Mask
02018106	Pediatric	A2,6ml	Mask

02018108	Adult	A3,10ml	Mask
02018109	Adult	A3,10ml	Hand Held
02018110	Adult	A4,8ml	Mask
02018111	Pediatric	A4,8ml	Mask
02018112	Infant	A4,8ml	Mask
02018113	Adult	A4,8ml	Hand Held

Scope of application

The product is suitable for clinical use of oxygen inhalation

Applicable

Outpatient, Respiratory Medicine, Anesthesiology, Emergency and other departments

Product features

- Made of GB15593 soft polyethylene raw material
- The tube body adopts a unique plum-shaped compression design
- Good elasticity and kink resistance
- Custom oxygen fittings can be matched with various humidification bottles

Component of product

Nasal prongs , oxygen tubing, adjusting ring, three-way connector, customized oxygen inlet connector

Available in a wide variety of tubing lengths

REF	Tubing Length

Oxygen Tubing

 Scope of application

The product is suitable for clinical use of oxygen inhalation

 Applicable

Emergency Department, Anesthesiology Department, ICU, Respiratory Department and other departments

 Product features

The mask is soft and smooth, making it soft and comfortable to wear

With oxygen tube, it is convenient to connect with air source

 Component of product

This product is composed by mask, elastic strap, tube and oxygen connector

Two side exhaust

The aluminum nose clip is adjustable

★ Available in a wide variety of tubing lengths

REF	Description	Mask Type	Tubing
02019101	Adult	Medium	PVC material
02019102	Pediatric	Concentration	Kink resistant
02019103	Infant		

 Scope of application

The product is suitable for clinical use of oxygen inhalation

 Applicable

Emergency Department, Anesthesiology Department, ICU, Respiratory Department and other departments

 Product features

The mask is soft and smooth, making it soft and comfortable to wear

With oxygen tube, it is convenient to connect with air source

2 diluters or 6 diluters available

6 concentrations available: 24%, 28%, 31%, 35%, 40%, 50% (60%)

Humidifier Hood

★ Available in a wide variety of tubing lengths

Respiratory Care

Respiratory Care

Tracheostomy Mask

Scope of application

The product is suitable for clinical use of oxygen inhalation

Applicable

Emergency Department, Anesthesiology Department,ICU, Respiratory Department and other departments

Product features

The mask is soft and smooth, making it soft and comfortable to wear

With oxygen tube,it is convenient to connect with air source

Component of product

This product is composed by mask,reservoir bag, elastic strap, silicone valve,3-way connector, oxygen tubing and connector

★ Available in a wide variety of tubing lengths

REF	Description	Partial/Non-Rebreathing	Rsesrvoir Bag
02019301	Adult	Non-Rebreathing	1000ml
02019302	Pediatric	Non-Rebreathing	750ml
02019303	Infant	Non-Rebreathing	750ml
02019311	Adult	Partial	1000ml
02019312	Pediatric	Partial	750ml
02019313	Infant	Partial	750ml

Scope of application

The product is suitable for clinical use of oxygen inhalation

Applicable

Emergency Department, Anesthesiology Department, ICU, Respiratory Department and other departments

Product features

The mask is soft and smooth, making it soft and comfortable to wear,with snap and w/o snap for choice

With 360 degree swivel connector oxygen tube, it is convenient to connect with air source

Component of product

This product is composed by mask, adjustable, strap, tube,360 degree swivel connector,with or w/o tubing for choice

★ Available in a wide variety of tubing lengths

REF	Description
02019401	Adult,with Snap
02019402	Adult,without Snap

Manual Resuscitator

FEATURES

All the best features at a price that fits your budget.
Soft cushion mask allows for an effective seal on the patient's face
The patient port swivels 360 degrees
Infant, pediatric and adult sizes available, with masks
Reservoir style is available in bag or tubing

★ Available in a wide variety of tubing lengths

REF	Description
02018801	PVC Adult

B Anesthesia

- Suction Catheter
- Closed suction catheter
- Mucus extractor
- Endotracheal Tube

- Anesthesia Face Mask
- Laryngeal Mask Airway
- Intubating Stylet
- Guedel Airway
- Berman Airway

Anesthesia

Suction Catheter

Scope of application

The product is suitable for clinical absorption of respiratory secretions

Applicable

ICU, Respiratory Medicine, Emergency, Pediatrics and other departments

Product features

The tip of the suction catheter is polished and formed by high-end equipment, which has no stimulation to patients

The color of the suction catheter connector adopts the international color standard, and the styles are various, which is convenient for clinical selection

Features

Designed for removing bronchial secretions in intubated patients during mechanical ventilation
Designed for 24 hours use
Better control of infections

Full automatic production
The output is 5 million roots/month
High quality and good delivery time

REF	Size	Connector	Remark
020231	6~18FR	A1,without control valve	Single Use Only
020232	6~18FR	A2,with "T"control valve	Single Use Only
020233	6~18FR	A3, with "cap on "control valve	Single Use Only
020234	6~18FR	A4,with "Y"control valve	Single Use Only

Scope of application

The product is suitable for clinical absorption of respiratory secretions

Applicable

ICU, Respiratory Medicine, Emergency, Pediatrics and other departments

Product features

The sealing film of the suction catheter is made of high quality resin, with strong toughness and exquisite feel, which is convenient for medical staff to operate

The suction catheter body is designed with scale line, which is easy to observe the safe depth of the sputum aspiration tube

The tip of the suction catheter is polished and formed by high-end equipment, which has no stimulation to patients

The closed suction catheter adopts a fully closed design, which can be used simultaneously with the ventilator to provide oxygen continuously during sputum suction. It is convenient and safe to operate and avoid cross-infection

Component of product

This product is composed of Y-shaped connector, sealing push plate, washing liquid inlet, humidifying liquid inlet, suction catheter sealing membrane, sputum suction tube, negative pressure control valve and sputum suction interface cover, etc

7 color date bars

Bisymmetric design
Side opening design
Sputum suction is faster,
leaner and more effective

Tip end polishing equipment
No stimulation to patients

Scope of application

The product is suitable for clinical absorption and collection of sputum for bacterial culture

Applicable

ICU, Respiratory Medicine, Emergency and other departments

Product features

The suction catheter is made of highly elastic medical PVC

The head end is processed by special technology to improve softness and no irritation to patients

The volume of the sputum collection flask is marked with a scale. After the sputum aspiration, the lower cover can be used to seal the flask for sputum bacterial culture

There is a sputum aspirator specially used for fiberoptic bronchoscope

Component of product

This product is composed of sputum collection bottle, suction tube, suction catheter

Calibration clear

40ml

REF	Description
020235	25ml,6~18FR
020236	40ml

With fiberglass style

The trachea can be observed under direct vision

Scope of application

The product is suitable for clinical general anesthesia or resuscitation to establish artificial airway

Applicable

Respiratory Department, Anesthesiology Department, ICU and other departments

Product features

Resistant to disintegration and kink, no irritation in patients with smooth head tip

The scale marks are persistent and clear, and are not degenerated by the concentration of anesthetics or gases used clinically

The tube body is inlaid with developing line to facilitate X-ray detection and determine the position of intubation in the body

Component of product

The common endotracheal tube is divided into with and without sacs

Intubating Stylet

Features:

Soft round tip
Flexible use for assistance of intubationAvailable with CE, ISO, FDA

Laryngeal Mask Airway

Anesthesia

Anesthesia

Guedel Airway

Scope of application

The product is suitable for the rapid establishment of respiratory passage during clinical anesthesia first aid and resuscitation

Applicable

ICU, Respiratory Department, Emergency Department, Surgery Department, Anesthesiology Department and other departments

Product features

Medical silicone or medical PVC material

Various specifications and models are complete, adapt to the human body physiological structure, simple and easy to operate

The contour design is consistent with the throat contour to minimize irritation to the patient

The laryngeal mask is less irritating and has less mechanical obstruction of the airway, which is more acceptable to the patient

No laryngoscope or muscle relaxant can be used, and postoperative sore throat is less common

Component of product

This product is composed of a capsule, a ventilation tube, an air source connect, an inflatable tube, Indicates the composition of air bag and check valve, according to whether there is in the ventilator wall metal reinforced linings can be divided into common type and reinforced type. Each type is divided into six specifications according to different tube diameters

PVC type available,please contact us for more information

Urine Meter Drainage Bag

Urinary Drainage Bag(Anti-Reflux type I)

Urinary Drainage Bag(Anti-Reflux type II)

Silicone Foley Catheter

Urinary Drainage Bag

Nelaton Catheter

Urology

Urine Meter Drainage Bag

Scope of application

The product is suitable for urinary incontinence, coma patients or mobility problems of urine monitoring and urine collection

Applicable

Urology Department, operating room and other department

Product features

The top of the metering box is equipped with a waterproof and breathable filter membrane to maintain atmospheric balance and facilitate the passage of urine

Accurate scale design provides more accurate data for clinical diagnosis

Sampling valve is made of silicone, which can ensure repeated operation without leakage

Cross valve design, convenient one-hand operation, fully protect medical staff, avoid cross infection

The bedsheet clip is easy to secure the drainage tube to prevent sliding

Magic hook can be easily suspended with different models and specifications of the bed bar,the tie bar can be suspended without hook

Backflow prevention devices can effectively reduce the probability of retrograde urinary tract infection

Component of product

This product is composed of metering box and storage bag

Scope of application

The product is suitable for postoperative drainage of waste fluid or urine collection from patients, and can also be used for urine collection from patients with urinary incontinence, paralysis, coma, mobility and other non-surgical patients

Applicable

Urology Department, operating room and other departments

Product features

Anti-reflux design can effectively reduce the incidence of urinary reflux infection

Equip with multi - level pagoda connector, can be connected with different specifications of drainage catheter

Easy to be fixed in any position with straps

020323315	1500ml,Anti-Reflux

Scope of application

The product is suitable for postoperative drainage of waste fluid or urine collection from patients, and can also be used for urine collection from patients with urinary incontinence, paralysis, coma, mobility and other non-surgical patients

Applicable

Urology Department, operating room and other departments

Product features

The scale is clear and accurate

Anti-reflux design can effectively reduce the probability of urinary reflux infection

Configure multi-stage pagoda connector to connect with drainage tube of different specification

Component of product

This product consists of drainage plastic bag, drainage cover, tube, anti-reflux plug catheter, connector and clamp

Collect urine outlet
avoid contamination

thicken bag body resist pressure,
difficult to wrinkle

REF	Description
020323320	2000ml,Anti-Reflux

 Scope of application

The product is suitable for urinary incontinence, paralysis, coma, inconveniences and other postoperative urine drainage

 Applicable

Urology Department, operating room and other departments

 Product features

Made of high quality silicone, the tube body is smooth and inlaid with developing line, which is convenient for clinical observation

Balloon has good balance and stretch, more safe in the process of use

Adopt color standard air valve, avoid specification and model confusion effectively

 Component of product

This product is composed of tube body, conical interface, one-way valve and balloon

Surgery

Suction Canister&Liner

Scope of application
The product is suitable for operation to attract residual liquid

Applicable
Respiratory Department, Operation room, Anesthesiology Department, ICU and other departments

Product features
Liner is soft and clean, easy to observe the residual liquid operation

Liner cover is smooth appearance, large diameter can easily add coagulant and disinfectant

With counter current value to effectively prevent liquid backflow, protect negative pressure equipment

One-time use without cleaning, avoid cross infection

Component of product
This product is composed of drainage bag, drainage cover, connect tube, clip, connector, anti-reflux plug, coagulant

Bubble tube

REF	Description
02044301	ID: 3-8mm

FEATURES

Manufactured from medical grade PVC is supplied non-sterile in continuous rolls with no end connectors
Kink resistant provides superior safety for the patient

Easily cuts to desired length with scissors

Flexible funnel ends attaches easily to most fittings and prevent kinked tubing

With integral connectors at every 31" (80cm) intervals

Dispensed in single convenient box

Available in 5mm and 7mm ID for options

30m or 50m pack sizes available

Miscellaneous

Stomach Tube

Miscellaneous

Miscellaneous

Irrigation Syringe

 Scope of application

The product is suitable for intestinal decompression, gastric lavage or nutrient infusion

 Applicable

Gastroenterology and other departments

 Product features

Medical PVC, medical silicone

The tube body has calibration and X-ray developing line, which is helpful to observe the position change of the tube in the body

The multi-functional design of the connector can be easily connected to the injector or syringe for perfusion or gastric juice extraction

REF	Description
020521	1 way ,6/8/10/12/14/16/18/FR

 Scope of application

The product is suitable for injecting food into the body

 Applicable

Gastroenterology and other departments

 Product features

- Perfusion is convenient
- Transparent barrel, easy to control the volume
- Latex Free

REF	Description
02057001	80ml

Rectal Tube

 FEATURES

Soft, clear tube with smooth tip

REF	Description
020571	8FR-32FR 40cm

Miscellaneous

Bulb Irrigation Syringe

 Scope of application

The product is suitable for washing human wounds

 Applicable

Gynecology, Surgery and other departments

 Product features

- Easy washing
- Transparent , easy to observe
